

TUBAGUS HADI

I have experience at finance institution for 8 years. Almost 2 years I have learn to process data and create some project such as at kaggle about corona virus visualization using R, DQLab project build recommender system using R and python, machine learning for retail. Capstone project from Algoritma Data Science Education Centre about visualization using Rshiny App about Airbnb Newyork.

Currently searching for a position as Data Analyst that allows me to build tools leveraging a combination of visualization, machine learning.
